

## Wienerberger India Pledges to #RebuildKerala

**Bengaluru, 20 August 2019:** The unprecedented rains and floods in Kerala have disrupted normal life and the extreme weather conditions taking everyone by surprise has proven to be deadly. Wienerberger India, operating in Kerala for decades, is devoted to the cause and is currently working to support the relief efforts. In addition, we also want to commit to *#rebuildingKerala*.

**Mr Monnanda Appaiah, Managing Director, Wienerberger India,** says - “We have always treasured Kerala as ‘God’s Own Country’, which in today’s day unfortunately stands ravaged by nature’s fury. ‘#rebuildingKerala’ is an initiative to rebuild the state brick by brick. Kerala being an important market for Wienerberger, we are committed to working for the people. We also, pledge to ensure our products are available quickly, at reasonable costs without compromising on the quality.”

We are with the people of Kerala today as we were yesterday as we will be tomorrow!

### About Wienerberger

Wienerberger AG, is the world’s largest producer of clay bricks and a leading supplier of clay roof tiles and infrastructure solutions globally. It is number 1 in clay roof tiles in Europe. Founded in 1819, the company brings forth to its customers a rich heritage of 200 years and an unmatched expertise of developing smart and sustainable solutions for building construction and for the infrastructure of tomorrow.

Having its headquarters in Vienna, the organization has always been committed towards promoting the concept of natural and green building materials which will help improve people’s quality of life and shape the future of construction. Wienerberger Group has a global presence in 30 countries and operates through 195 production sites spread across the globe.

### About Wienerberger India

**Wienerberger**, started its operation in India since 2009. In its decade long story in the country, the organization has remained market leader in delivering high-quality clay building materials for modern living. Its sustainable, future-ready solutions are setting trends in new-age constructions while improving people’s quality of life. Wienerberger has its own state-of-the-art production facility in Karnataka which is also its first Asian plant. The facility is highly automated and engages robots for material handling, while adopting efficient use of locally available raw materials and energy to produce green and sustainable bricks for the Indian market. In continuation with its rich legacy of 200 years, the goal of Wienerberger India is to meet the design requirements of architects, developers and builders while creating natural and healthy living spaces for the Indian consumers.
